### **DETAILED ACTION**

1. The examiner acknowledges the amendments received 17 May 2007. New claims 39-40 are added; claims 1, 11, 13 and 17-40 are pending.

### ***Claim Objections***

2. In view of the amendments received 17 May 2007, the objection to claim 36 is withdrawn.

### ***Response to Arguments***

3. Applicant's arguments filed 17 May 2007 have been fully considered but they are not persuasive. In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). For example, the applicant argues (pages 9-10, "Remarks") "the Vaschillo reference [previously cited] does not dispense a therapeutic gas to the person during the inhalation phase of the breathing cycle and does not dispense therapeutic gas based on heart rate variability," and "there is no teaching within the Krebs reference [previously cited] of coordinating breathing, and thus the application of therapeutic gas, with the heart rate variability cycle for purposes of respiratory therapy," and "the Krebs reference monitors heart rate only to determine whether the application of gas to the patient is excessive to prevent side effects and

provides no teaching of how to determine whether the application of gas is excessive based on heart rate.” The examiner would like to note that the absence of these features was addressed in the previous Non-Final Office Action, and the combination of Vaschillo and Krebs was explained therein.

***Claim Rejections - 35 USC § 103***

4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
5. Claims 1, 11, 13, 17, 21-35 and 40 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vaschillo et al (U.S. 5,997,482) in view of Krebs (U.S. 2002/0185126). For a complete discussion of the claim elements, please see above and the previous Non-Final Office Action.
6. Regarding new claim 40, It has been held that the recitation that an element is “adapted to” perform a function is not a positive limitation but only requires the ability to so perform. It does not constitute a limitation in any patentable sense. *In re Hutchison*, 69 USPQ 138. Since Vaschillo in view of Krebs discloses a therapeutic gas dispenser, a care recipient indicator, a heartbeat detector, and a heart rate variability monitor, as discussed above, Vaschillo in view of Krebs is considered to be adapted to, and capable of, being used in the claimed manner.
7. Claims 18-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Vaschillo et al (U.S. 5,997,482) in view of Krebs (U.S. 2002/0185126) and in further

view of Lutchen et al (U.S. 6,435,182). For a complete discussion of the claim elements, please see above and the previous Non-Final Office Action.

***Allowable Subject Matter***

8. Claims 36-39 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Conclusion***

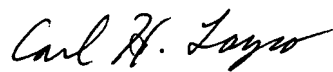

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
